1 Introduction

Microchip® LoRaWAN stack for SAMR34 provides a solution for the LoRaWAN end-device that can be used for Internet-of-Things applications. Typical LoRaWAN network is composed of end-devices, gateways, network servers and application servers.

This document provides information and guidelines on changes on SAMR34 Application Setup.

2 Test Setup Details

2.1 Hardware Requirements:

- SAMR34 Board (MCU-ATSAMR34J18B)
- ATSAM4L-XPRO (MCU-ATSAM4LC4C)
- Atmel-ICE Debugger
- MCHP EU and NA Gateways/Mutlitech GW

2.2 Software Requirements:

- Atmel Studio 7.0.1417
- SAM4L Serial Bridge Firmware

Note: Serial bridge firmware for SAM4L Xplained Pro is given here as an example. User can use serial bridge code from ASF with other supported Platform.

2.3 Connectivity Details:

- In SAMR34-XPRO board, EXT1 Interface PA4, PA5 and GND is connected to ATSAM4LC4C EXT1 Interface PB00,PB01 and GND correspondingly for UART communication
- In SAMR34-XPRO board, CORTEX DEBUG is connected to Atmel-ICE SAM Interface for debugging and flashing

- USB Power to be connected for SAMR34 EDBG USB/TARGET USB
- USB power to be connected for ATSAM4LC4C for UART communication
- USB Power to be connect for Atmel-ICE for UART communication, debugging and flashing

2.4 Test Environment details:

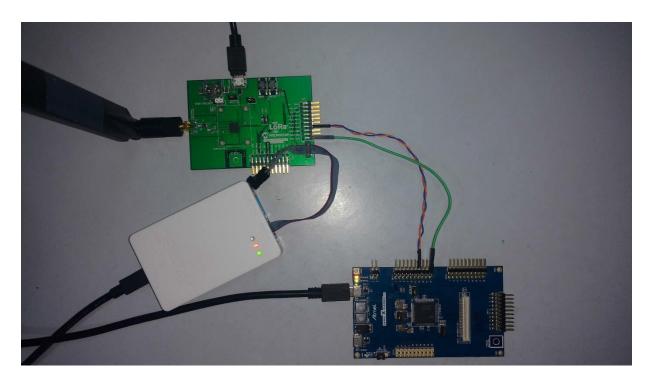

Fig: SAMR34-XPRO Board EXT1 interface PA4, PA5 and GND is connected to SAM4L-XPRO EXT1 interface PB00, PB01 and GND

3 Application Setup

Please refer the Microchip LoRaWAN Stack Quick Start Guide and 2.4 Test Environment details.

4 Example Application

Please refer the Microchip LoRaWAN Stack Quick Start Guide.

5 ATPack installation

SAMR34 is not released in Atmel Studio. So in order for SAMR34 to be detected,

"Atmel.SAMR34_DFP-0.1.7.atpack" has to be installed in the PC.

- Double click "Atmel.SAMR34_DFP-0.1.7.atpack" provided in the release.
- Click Install once window pop-up.
- Re-start the Atmel studio if already opened.

Note: Installation is only required once. If it's already installed, avoid installing again.
